

SOLUTION INDUSTRIES

Solution Industries has become the market leader in providing specialty parts that require secondary operations to our distribution only based customer model. Our customers receive parts complete meeting the OEM or distributors' required specifications. We offer full transparency through the entire supply chain.

Our legacy has been to provide material with secondary processes, but our manufacturing partners allow us to provide high quality, specialty printed products regardless if a secondary process is desired.

Solution Industries works with select manufacturing and application partners both overseas and domestically in order to handle your product every step of the way. This includes manufacturing, coating, thread lock features, testing, accompanied by full documentation and customized packaging.

Due to the stringent requirements expected from OEM's and our distributor partners, Solution Industries has become an AS9001D certified company. These certifications give our customers the added confidence that we will meet their requirements throughout the entire multi-step process. *In short, we offer:*

- »» **Manufactured parts**
Cold Form, Hot Form and Machined
- »» **Materials**
Alloys, Carbon, Non-Ferrous, Stainless Steel, Superalloys/Nickel Based
