

Understanding CBAM The EU's Carbon Border Adjustment
Inviting all MWFA & CMC/NASF members and industry personnel!

Join Us for an Exclusive Dinner Event: Understanding the EU's Carbon Border Adjustment Mechanism (CBAM)
Are you prepared for the changes the EU's Carbon Border Adjustment Mechanism (CBAM) will bring? This groundbreaking policy is designed to put a fair price on carbon emissions, align import and domestic carbon costs, and encourage cleaner industrial practices globally. But with its implementation come many questions, and complexities.

Join **Darlene Collis from Lindfast** as she unpacks the essentials of the CBAM and addresses the questions and concerns that matter most to you and your business:

- What exactly is the CBAM, and how does it work?
- Do you have reporting obligations, and what are the transitional requirements?
- Who is responsible for CBAM compliance when parts are imported into the EU?
- How do direct and indirect embedded emissions factor in?
- What happens if a vendor lacks a CBAM template?
- Will quarterly monitoring of carbon emissions become a long-term requirement?

With the CBAM already reshaping the global trade landscape, now is the time to ensure your business is equipped to navigate these changes and remain competitive in the EU market.

Date: Thursday, February 13, 2025
Location: Venuti's (2251 West Lake St, Addison, IL 60101)
